Executive summary

What your answers show

Leaking

Test Profile, your customer journey scores 87 out of 100. There are significant gaps in your journey. You're winning attention and then losing people who were ready to book - which means growth is costing far more than it should.

Your strongest stage is Lead Sources & Discovery at 100/100. The stage costing you most right now is Lead Response at 10/100 - which is where this report starts.

What the gaps are costing you **£10,300 a year**

Enquiries that wait too long for a reply **£10,300**

Based on 28 appointments a week at £110 over 50 working weeks, an estimated £154,000 a year. The total above is held to 15% of that.

Your one priority

Priority 1

Lead Response

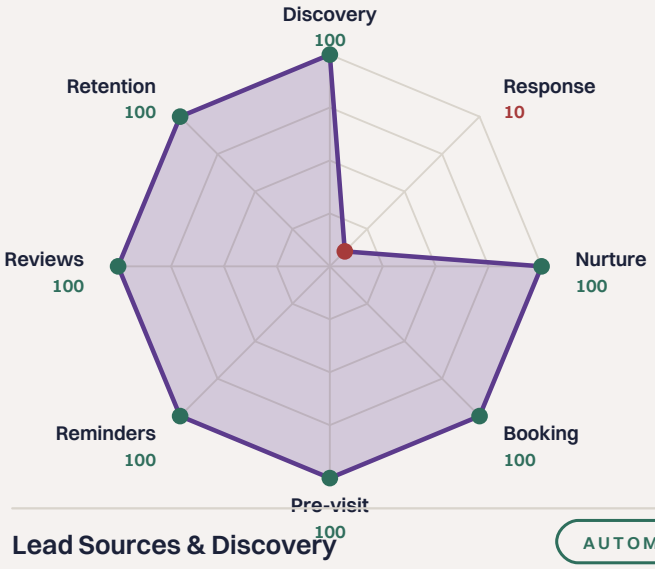

10/100 · Critical gap

Enquiries wait a day or more, and most people booking a service will have chosen someone else by then.

The next page maps all eight stages of your journey. From there the report narrows: the number to move over the next ninety days, then the two or three stages your own figures say are costing you most, written up in full.

All eight stages

Your journey at a glance

How each stage is being run

AUTOMATED happens without anyone thinking about it

SYSTEMISED there is a process, but it still needs you

MANUAL depends on somebody remembering

Manual is under 50, Systemised is 50 to 74, Automated is 75 and over.

Lead Sources & Discovery

AUTOMATED 100/100

You're findable. People looking for what you do can see you, trust you and reach you without hunting - which means the rest of your journey gets a healthy flow of enquiries to work with.

Lead Response

MANUAL 10/100

Enquiries wait a day or more, and most people booking a service will have chosen someone else by then.

Lead Nurture & Follow-Up

AUTOMATED 100/100

You follow up properly, so interest that doesn't convert on day one still becomes a booking later. That's revenue most businesses in your sector simply leave behind.

Booking Process

AUTOMATED 100/100

Booking is effortless: clients can commit the moment they decide, without waiting on you. That protects every enquiry your marketing works to create.

Confirmation & Pre-Appointment

AUTOMATED 100/100

Clients arrive knowing exactly what to expect, prepared and confident. That shows up as fewer no-shows, calmer appointments and better first impressions.

Reminders & No-Show Prevention

AUTOMATED 100/100

Your reminder system is doing its job, and the diary you fill is the diary you actually work. That's straight profit protected.

Reviews & Reputation

AUTOMATED 100/100

Your reputation is compounding. Reviews arrive consistently, you respond to them, and new clients arrive already trusting you.

Retention & Re-engagement

AUTOMATED 100/100

You don't yet know what a client is worth over their lifetime, so there's no way to judge what any gap in this journey is actually costing you.

IN 90 DAYS

Under 15 minutes in working hours

Why this number matters most for you

This is the first few minutes after someone contacts you, and it is the fastest-moving number in the business. A reply inside five minutes converts several times better than the same reply an hour later, because the person is still sitting there with your competitors' pages open. It costs nothing but a system.

Replying in minutes instead of hours wins back work you had already done the hard part for. It costs nothing once the system is in place, it runs while you are with a client, and people read a fast reply as a business that has its act together.

How this number was chosen

Each of the eight stages owns one number. Lead Response scored 10 out of 100, and because it carries more weight in your overall score than most, that gap is costing you more than any other single stage. So the number for this quarter is Enquiry response time.

How to measure it

Track the following data: how many minutes pass between an enquiry arriving and a reply going out that actually answers the person.

Where to get it

Your phone already keeps this for you. Open your last ten enquiries wherever they came in: Instagram messages, Facebook messages, email, your website form, missed calls. Each one shows the time it arrived and the time you answered. Write down the gap for all ten. Measure to the reply that answers their question and offers them a way to book. An automatic acknowledgement is not that reply, so do not stop the clock there.

How often to check

Once a week, on your most recent ten enquiries. Look at the slowest of the ten rather than the average, because the slowest one is the client who went elsewhere.

What's working

- Nothing scored strongly here yet.

The gaps

- Enquiries wait a day or more, and most people booking a service will have chosen someone else by then.
- Nothing happens automatically when someone enquires, so every enquiry waits for you to be free.
- Enquiries that land while you're with a client sit untouched - and that's most of your working day.

What to do

QUICK WIN

Put something on every channel this week that answers the first question on its own - a chatbot if you can, an auto-reply with your prices and a booking link if not - so nobody is waiting on you to be free.

This alone can recover a meaningful share of enquiries you're currently losing without ever seeing them.

QUICK WIN

Switch on instant replies on Instagram and Facebook, and an automatic confirmation email on your website form. Include your prices and a booking link.

Every enquiry gets acknowledged in seconds, which stops people messaging three other businesses while they wait.

THE NEXT LEVEL · BUILT WITH YOU

An AI assistant that answers on every channel you use, at any hour, in your words. It handles price and availability, asks the one or two things you need to know, and books straight into your diary. Anything it cannot answer arrives with you already summarised, so you reply once rather than from the beginning.

Tools

Start here

- Instant replies turned on in Instagram and Facebook settings, with your prices and a booking link in them.
- An automatic reply on your website form, so nobody is left wondering whether it sent.

The joined-up version

Every channel feeds one inbox, the first reply goes out on its own with a booking link in it, and anything that needs you is waiting in one place rather than on four apps.

The plan

Week by week

Everything from the roadmap, in the order to do it. All of it moves Enquiry response time.

1 Phase one

Weeks 1-2

QUICK WIN — Response

Put something on every channel this week that answers the first question on its own - a chatbot if you can, an auto-reply with your prices and a booking link if not - so nobody is waiting on you to be free.

QUICK WIN — Response

Cover every hour, not just your working ones, with a chatbot or auto-reply that can answer and book without you.

2 Phase two

Weeks 3-6

QUICK WIN — Response

Write and save three response templates covering your most common enquiries, with a clear next step in each.

3 Phase three

Weeks 7-12

QUICK WIN — Response

Start a one-line-per-enquiry log: date, source, whether they booked. Review it monthly.

THREE THINGS YOU CAN DO THIS WEEK

Three ways to close these gaps

Everything in this report is one 90-day cycle: Enquiry response time as the focus, with the priorities that move it. That is exactly how the LEAP sprint runs. You can run it yourself - the real question is how much of it you want to carry alone.

Option 1

Run it yourself

Included

The whole cycle is written out for you to work through in order. Be warned that it is a fair amount of work: three months of building, testing and following up around an already full diary, and the parts you're least sure about are usually the ones that slip.

Option 2

Your top priority, built for you

From £950

We take the gap that's costing you most and build the fix properly, so it runs without you remembering to do it. Any quick wins that sit alongside it are included in the build.

Option 3

LEAP - 90-Day Sprint

From £2,500 a month

The same cycle, built with you across ninety days: your focus KPI, the aligned priorities, fortnightly sessions, and the work shared rather than left to your evenings. Your number gets looked at every two weeks, which is usually what separates a plan that happens from one that doesn't.

About

Tulivo Digital

Jemina Semakula helps service business owners fix the journey between "I'm interested" and "I've booked again". Most of them don't have a marketing problem - they have a journey problem: enquiries that go unanswered, follow-ups that never happen, and clients who simply drift away.

The work is practical: response systems, booking that doesn't lose people, reminders that protect your diary, review engines and retention sequences - built into the business, not handed over as a document.

What we do

- Customer journey diagnostics and implementation
- AI assistants and automated client communications
- Automation and CRM builds for clinics, studios and salons
- Websites and booking journeys designed to convert
- Reputation, retention and referral systems
